More exciting for you to explore

Click ©2020 JunJun at the bottom of the page to enter more interfaces. Here, you can view the **current version, update record, update content** and other information. View our **open source project, use instructions, and feedback related information to support us**. Can be operated on this interface.

Treasure Box

Introduction

Treasure Box is a derivative of Lite-New-Page.

Here, you can easily jump and customize your own URL navigation.

In the future, we will add a row of links for random customization, thank you for your support.
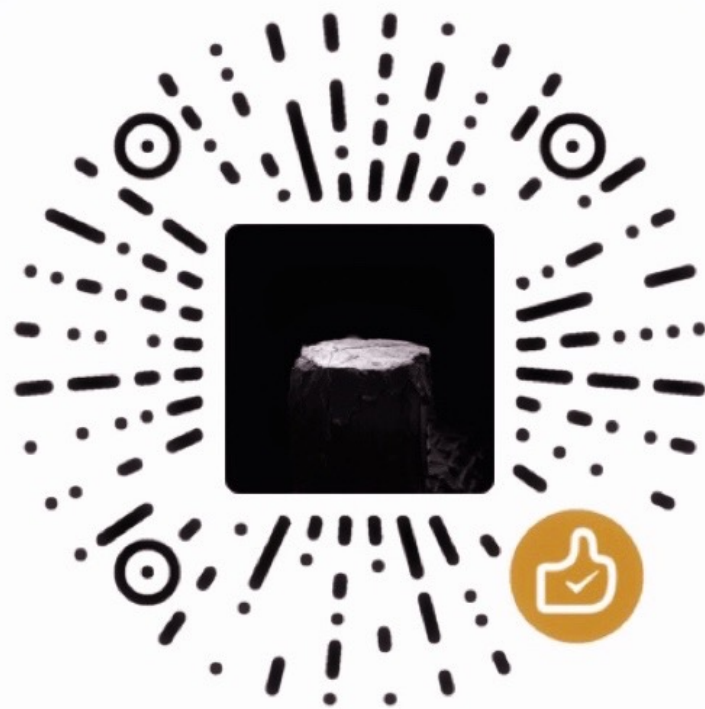

About us

About the Author

My student party has no income. Recently, I earned 3 yuan by sharing some good websites with **bilibili**.

I originally thought that the homepage of the browser is not very good, either it does not meet my appetite, or there are too many advertisements and too many elements.

Development is not easy, if you like our products. Just support and appreciate me. One cent is also an encouragement to us.

(WeChat to Scan code)

Project future

I insist on open source for this project (Apache 2.0)

Thank you all too.

As we all know, our current website is deployed on **Gitee** and we have no money to buy servers and web hosting qwq

There are many needs now: **custom wallpaper, multiple wallpaper choices, etc.**, we all understand your needs.

But our project is really no money, use love to generate electricity.

Regarding the development of the account system, we still have to see your support. Really. Really.
